

ABHISHEK KUMAR

(+91) 9905648098 | abhishek@craftovercode.com | linkedin.com/in/abhishek-kr607

SUMMARY

Experienced software engineer with more than 4 years of experience in backend development. Stronghold in data structure and algorithms. Expertise in Neo4j, Java, Spring Boot microservices, Elasticsearch, and Kafka with a working knowledge of AI/ML, Python and Natural Language Processing (NLP)

SKILLS

Technical	Java • Javascript • Python • C# • C • C++
Frameworks & Tools	Spring Boot • Microservices • NodeJS • ASP.NET • Kafka • Azure • AWS • Cron jobs • CI/CD • Docker • Kubernetes • Postman • Git • Github • JIRA • OpenSearch
Databases	Neo4j • PostgreSQL • ElasticSearch • CosmosDB • DynamoDB

EXPERIENCE

Sep 2021 -
Present

INFOSYS LIMITED, *Digital Specialist Engineer*

Wingspan (SaaS Product) | *Authoring Tool Team*

- Developed **Cross-Portal SpringBoot** microservice allowing **millions** of contents to be available in another portal / org via *request-approval* process
- Developed **Admin microservice** to facilitate admin operations on contents on platform
- Developed **Node.js console app** to import & update thousands of contents from third parties like *Coursera, Linkedin, GetAbstract, One LMS* etc. scheduled via **Cronjobs**
- Developed **RESTful APIs** to support content migration which has hits of **800K** daily
- Streamlined context feed of **thousands of 3rd party contents** daily to Wingspan's **Knowledge Assistant AI** via **Kafka** producers, strengthening the content based responses.
- Build a POC of **MCP Server** of owned admin microservice for the Curators Corner
- Implemented **Sentiment Analysis** batch job in Python from **content-feedback** using a fine-tuned **RoBERTa model** to classify sentiments (positive, negative, neutral)
- Build **catalog service** allowing **thousands of authors** to classify their contents
- Integrated **Elasticsearch** in SpringBoot microservice for fetching & managing scheduled events
- Automated onboarding process for various tenants, like **Siemens, FIFA, Kia, IMF, NPCI** etc.
- Automated workflows via **cron jobs & scripts**, reducing manual intervention by **70%**
- Own modules which has **4 Million API requests** daily on an average

Proximus | *Master Product Catalog Team*

- Collaborated with Proximus in Product Catalog Engineering as a software engineer.
- Assisted the team with bug fixes in catalog tools, enhancing tool reliability and performance.
- Delivered and deployed **.NET** applications to servers, ensuring smooth transitions and operational continuity.
- Maintained catalog tools built in **.NET** framework to validate the product portfolio, ensuring accuracy and readiness for the next stage in the pipeline.
- Contributed to maintaining the integrity and efficiency of the product catalog system.

INTERNSHIP

July - Sep,
2021

CLOMOTECH, Backend Engineer

EagleEye | Internship

- Refactored codebase to improve readability, maintainability, and performance.
- Implemented token-based authentication using **JWT**, enhancing security and user session management.
- Modified HTTP response body in the **middleware** to ensure consistent and accurate data handling within the **ASP.NET** framework
- Implemented decrypting of incoming HTTP requests in the middleware, processing them, and re-encrypting responses

Feb - June,
2021

JUNEPT SOFTWARE (INDIA) LLP, Backend Engineer

DentalLeap | Winter Internship

- Implemented **Azure CosmosDB** as a replacement for **Azure Table Storage**, enhancing data capabilities for service APIs and function apps.
- Migrated data and ensured seamless integration with existing services, improving performance and scalability.
- Utilized Azure CosmosDB's global distribution and multi-model support for more robust and flexible data management.
- Improved data access speed and reliability, leading to more responsive APIs and function apps.
- Ensured high availability and low latency through Azure CosmosDB's advanced features.
- Collaborated with cross-functional teams to ensure smooth transition and minimal downtime during the migration process.

May - July,
2020

CLOMOTECH, Backend Engineer

Darwin | Summer Internship

- Developed robust APIs using ASP.NET, enabling efficient data processing and interaction.
- Leveraged **AWS DynamoDB** as a **NoSQL** database for scalable and flexible data management.
- Deployed APIs on **AWS Elastic Beanstalk**, ensuring automated infrastructure management and high availability.
- Collaborated with UI teams to integrate APIs, enhancing user experience and application performance.
- Monitored and optimized application performance, scaling resources as needed to maintain optimal operation.

EDUCATION

2019-21

DHIRUBHAI AMBANI INSTITUTE OF INFORMATION AND COMMUNICATION TECHNOLOGY (DAIICT) | MSc (IT) | 7.7CPI

GANDHINAGAR, GUJARAT

2016-19

PATNA SCIENCE COLLEGE | BCA | 80.4%

PATNA, BIHAR

EXTRA CURRICULAR

Achievement

Recipient of 3 Insta Award at Infosys in recognition of exceptional performance and consistent delivery excellence

Certification

Neo4j Certified Professional • Atlassian Certified in Jira Essentials
